

July 7, 2020

Hello everyone,

I hope that this update finds you well and that you are coping with this humid weather.

I am happy to inform you that we continue to have no active cases of COVID-19 at any of our congregate, supportive housing, assisted living and long term care sites.

As you know, we are continuing to work under the directives of Public Health, the provincial government and our provincial associations. We have been hosting outdoor visits at our sites and these are going well. We have had to make a few adjustments to our schedules based on heat advisories to ensure the health and well-being of our clients and residents. We continue to appreciate your patience through this time and it has been wonderful to see family members connecting with their loved ones at all of our sites.

We continue to have our long-term care staff tested every two weeks for COVID-19 as part of the surveillance testing announced by the provincial government several weeks ago. At this time, all test results received to date have been negative. We will continue to keep you posted as further information becomes available.

Please continue to look after yourself and stay well and cool!

Steve Sherrer
CEO
