

## **St. Peter's Residence - Outbreak Update**

Dear Residents and Family Members,

We are pleased to announce that there have been no new cases of symptomatic residents or staff at St. Peter's Residence. There continues to be only one staff person on the line list and they are doing well. All of the residents living in the affected home area have been tested for COVID-19 as well as all of the staff in the home. The results are all still pending. We will be notifying residents and/or their substitute decision makers of test results as soon as they are returned.

The team at St. Peter's Residence has truly been living the Thrive Group value of Teamwork. They have been working closely with Hamilton Public Health and have worked to ensure all additional precautions related to the outbreak have been implemented.

We would like to thank all of the residents and families for the overwhelming support, kindness and the words of encouragement shared with the staff during the pandemic and especially since the declaration of the outbreak.

I would personally like to thank the dedicated staff and leaders at St. Peter's for their courage and commitment to the health, safety and wellbeing of all of those that live and work at the Residence.

Stay healthy and safe,

Steve Sherrer  
CEO
